Carpinteria, CA 93013

To whom it may concern,

The Carpinteria Valley Water District (CVWD) has approached Sandyland Protective Association (SPA) to request permission to locate a clustered sentry well on SPA property near the existing well 4N25W30D1. We understand that this well is for the purposes of monitoring groundwater quality and will require periodic access to install, maintain and monitor this cluster of wells. We understand that there is some flexibility with respect to the location of the well on SPA property. The final well location will be determined and established in an agreement between CVWD and SPA.

We are amenable to the idea of placing the monitoring well on the SPA property and support the efforts of CVWD to manage and protect the Carpinteria Groundwater Basin. We plan to work with CVWD if the project moves forward in finding an exact suitable location within or near the area of well 30D1.

If you have any questions or would like to discuss SPA's intent in this matter please do not hesitate to contact me at (213) 507-0347.

Thank you,

Gordon Krischer  
President  
Sandyland Protection Association
